

My family and friends get a positive message from the music played on K-Love. By replacing the programing, You will be taking away something us christians are happy to have and listen to.

K-Love is a station that does not play music labeled as adult content. The music played on K-Love makes me feel happy, and is not depressing. Just listen to other stations and hear the lyrics compared to the lyrics heard on K-Love. Please think about what you are about to do by taking away something I as well as my family enjoy.
